* The number of performance shares that each person could be entitled to, provided the full outcome of performance targets.

** Certain performance targets are determined annually by the Board but are not presented until the end of each program, so the number of earned performance shares can only be stated after the last day of each program's earning period.

*** The number of performance share rights that are conditional on continued holdings coincides with the number of performance share rights that are dependent on performance terms.

Performance share programs and Employee stock option programs

Employee stock options and performance shares are valued at fair value at the date of allocation. The total cost is distributed over the vesting period. At the end of the vesting period, a reduction in staff turnover is assumed, which entails an increased cost. The cost is accounted for as personnel cost and is credited to equity. The social security cost is revalued at fair value. When the options are exercised, the Company issues new shares. Payments received on behalf of the shares issued are credited to equity.

Variable remuneration

The variable remuneration is linked to one or more predetermined and measurable criteria, which can be financial, such as net sales and operating profit (EBIT), or non-financial, such as qualitative targets. Less than 40 percent of the variable remuneration must be due to non-financial criteria. The criteria have been chosen to realize the Company's strategy and to encourage actions that are in the Company's long-term interest. By linking the goals in a clear and measurable way to the Company's financial and operational development, they contribute to the implementation of the Company's business strategy as well as the Company's short- and long-term development, including its sustainability.
